DETAILED ACTION

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 4-6, 8-10, 11-14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of copending Application No. 10/310,134. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claimed invention has a reflecting unit that is elastically rotated and the system has a shielding electrode means whereas the copending does have the shielding means (claims 10, 15, 17) but does not contain the obvious design choice of elastically rotating specifics, but the torsion bar can have this property to various degrees depending on the flexibility needs of the system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 3, 7, 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2873

4. The following is a statement of reasons for the indication of allowable subject matter:

Having the slit in the claimed system is not shown or suggested by the prior art. The above rejected claims will be allowable with a terminal disclosure, and the structure and position of the shielding electrode is not shown or suggested by the prior art.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References 6791742, fig. 2, and 6519075, fig. 7B, both show the concept of shielding but do not show the structure of the instant claimed invention.
